

CAD/CAM Connect Announces New CAM Software Partnership

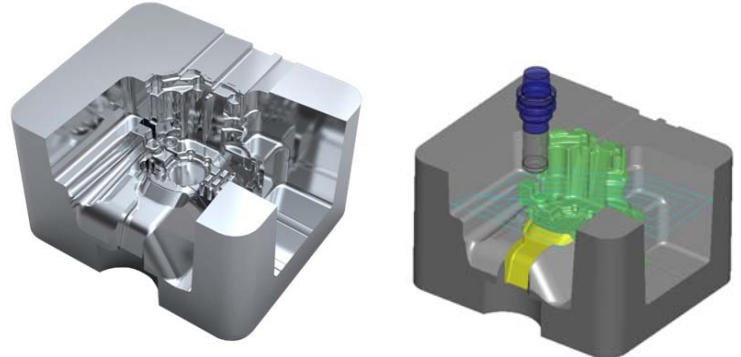

Online CAD/CAM destination further expands its CAM portfolio by bringing on NCG CAM

[CAD/CAM Connect](#), the online destination for mechanical engineers and machinists to research, buy and save on CAD/CAM products and services, has teamed up with **NCG CAM** to offer their advanced high-speed 3D machining CAM package. **NCG CAM** is used to machine prototypes, models, casting, molds, dies, patterns and finished products.

“As we add CAM partners, we take into account several factors, including company background, customer satisfaction, ease of use, CAD integration, multi-axis capabilities, machining disciplines supported, niche markets they serve and the ability for the supplier to customize and support post processors, “ says CAD/CAM Connect CEO Ken Wilson. “Every member of **NCG CAM**’s support team has worked on the shop-floor using CAM software, allowing them to provide excellent customer support. **NCG CAM** specializes in high-speed 3D machining and does a great job at it. For some companies, that’s really all they need. We have heard all positive feedback about their products and their team, and are excited to have NCG CAM Solutions Ltd on board.”

“We pride ourselves on creating the highest quality high-speed 3D milling CAM package around, “says Estelle Dunsmuir, Sales & Marketing Director, NCG CAM Solutions Ltd. “Our partnership with CAD/CAM Connect will allow us to get the word out about **NCG CAM** to the masses. ”

“There are a lot of CAM packages to choose from. The addition of **NCG CAM** gives machinists another very strong, efficient high-speed 3D milling option when considering which CAM package is right for their needs “says Wilson.

About CAD/CAM Connect.com

Unlike traditional resellers, [CADCAMConnect.com](#) partners with multiple CAD/CAM/CAE product and service providers who are among the top in their industry. The site offers industry news, trends, user forums and discussion groups, with various deals on different products giving mechanical engineers, machinists and design professionals one place to go for all of their needs.

About NCG CAM Solutions Ltd.

Established June 2009 in Cambridge, UK, **NCG CAM Solutions Ltd** provides CAM software solutions to manufacture prototypes, models, moulds, dies, castings, patterns and finished products. Our specialty is 3D HSM CAM with our product **NCG CAM**. Our staff has a wealth of CAM experience, having worked in the CAD/CAM and engineering industry for many years. We sell and support our products through a global network of resellers.
